

EasyCall<sup>®</sup> the **easy** way to  
**increase** your profits

EasyCall<sup>®</sup>  
perfect for alfresco dining...

# EasyCall<sup>®</sup>

the easy way to increase your profits

**EasyCall<sup>®</sup> increases profits by encouraging customers to maximise their spending on valuable up-sell orders for food and drinks, without ever having to leave their seat.**

EasyCall<sup>®</sup> is an effective low cost wireless communication paging system, which shows that your organisation cares about the quality of service you want to provide to ALL your customers.

EasyCall<sup>®</sup> enables customers to call for immediate service, at the touch of a button.

There are two button options, one the size of a two pound coin that can be counter sunk into a table top, the other is 11cm in diameter, surface mounted with optional promo back. Both options are IP rated weatherproof, ideal for outdoor conditions. Customers push the button when service is required which transmits a signal directly to a wall or desk mounted panel (16, 32 or 64 button panel options), indicating the table number requiring service.

Overall service levels will be improved by decreasing response times which increases customer satisfaction.

Being Wireless, the system is unobtrusive to install and running costs are minimal.
