

StewardCall[®]

keep your crowd
safe

CST's StewardCall[®]

Respond **instantly** to your Stewards requests

StewardCall[®]

...control at the touch of a button

The StewardCall wireless buttons from CST provide a unique on-site messaging solution ideal for stadium, arena and other sporting event venues.

At a crowded sport event, the difference between seconds and minutes can diffuse a dangerous situation or even save a life. Immediate response with Supervisor, Emergency Medical Assistance, Evacuation Squads or cleaners throughout the arena is essential to protect the public and your business. The StewardCall system puts immediate communication in the palm of your hand.

With CST's StewardCall transmitters, you can give every section steward instant and discreet access to summon key personnel. The system delivers greater responsiveness with stadium-wide coverage.

At the heart of the system is CST's Genesis software package. This logs all the calls and gives the control room instant knowledge of every situation, keeping you informed about what's going on and where, throughout the stadium, before, during and after the game. It also allows staff to access the system, via PC terminals based around the venue, to send messages to any individual or groups with pagers.

The log is an important benefit, not only for management data but also for due diligence - it can show exactly when an emergency happened!

StewardCall is your solution to...

- Decreasing Radio Traffic
- Instant messaging including group paging
- Directing staff to specific areas immediately
- Reducing delays in response time
- Ensuring a secure stadium environment
- Management reporting for operational analysis

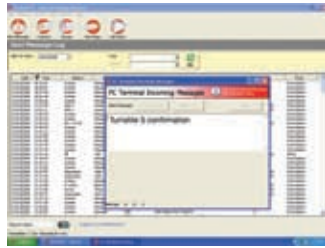

Alphanumeric Pagers

- Easy to read alphanumeric text
- Available in 2, 4 or 8-line display
- Rugged and reliable design
- Silent vibration or tone alerts
- Low battery indicator
- User 'switch-off' disable feature
- Bright backlight display
- Robust belt / pocket clip
- Easy to replace batteries

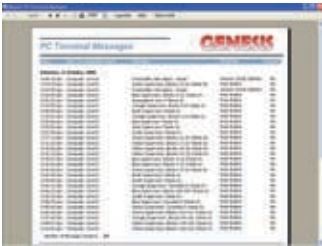

Paging Software Main Screen allows communications to be sent direct to pagers from a PC on the stadium LAN

Message Pop-up screen will give control room staff confirmation of open/sweep stadium requests

Sent message log records every message sent and request for assistance

Message reporting allows you to run management reports for analysis

Software Requirements

- Windows 2000/XP operating system
- Pentium III Ghz or higher processor
- 256mb RAM (recommended)
- 150mb HDD Space
- One COM port (9 pin DB serial port) or USB per module interface
- Network Capability (if LAN client requested)

Genesis Software Interface Modules

Task Module Manager - Creates a closed cycle workflow for all tasks and maintenance activities.

LAN Paging - Send alphanumeric messages from any networked computer.

PABX Telephone Paging - Unlimited pre-defined alphanumeric messages to individual pagers or groups via the PABX.

Contact Closure Alarms - Monitors alarm contacts for closure and alert.

Wireless Lone Worker - Supervised Wireless Personal Attack Pendants for Lone Workers.

Wireless Security Devices - Supervised Door Break, Glass Break, Smoke Detector and PIR Sensors.

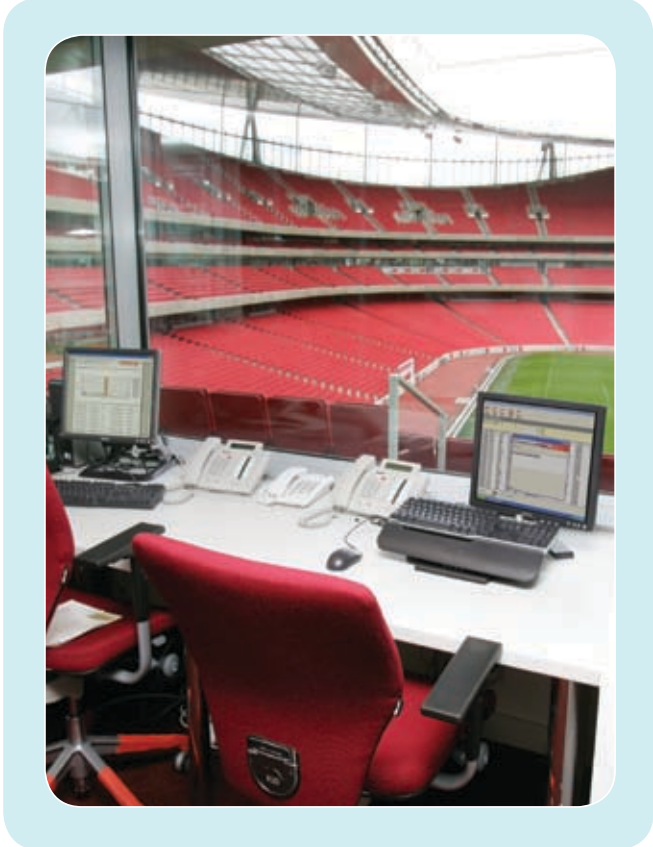

Email Alerts - Alerts you to email subject for systems monitoring.

DECT Text Messaging - Text messaging to DECT cordless handsets.

SMS and Wide Area Paging - Dials up to a GSM or Wide Area Paging server to send out SMS messages.

Web Browser - Send messages to pagers with web browser module over LAN, WAN & intranet.

Systems - Compatible with IE6.0, Firefox, Mozilla, Opera etc.

StewardCall[®]

“The beauty of the system is that it gives all 700 of our stewards a simple, cost-effective, fast way to communicate, it keeps us firmly in the know.”

Arsenal Emirates Stadium Manager, John Beattie, is a fan of StewardCall

Capabilities:

CST UHF transmitters offer 2 watts of power to provide complete Stadium-wide coverage.

2-button or 4-button transmitters can be programmed with a variety of messages for custom implementation.

Each StewardCall unit can signal a single person or a group of people with the touch of only one key.

Available 868MHz signal repeaters to expand coverage to StewardCall transmitters.

StewardCall is an ideal solution for:

- Stadiums
- Arenas
- Conference Centres
- Exhibition Centres
- Auditoriums
- Concert Venues
- Race Courses
- Motor Sport Venues
