

The moisture and dust-proof design of the button makes it suitable for use both indoors and outdoors. Its light and pressure-proof body is anti-scratch.

The delicate pattern on the one-touch button increases the feeling of touch, while the LED signal light up through the partially thinned down top case. Devoid of any exposed partlines, the design is also water and dustproof!

Specifications

General

Frequency	434.6500 MHz
Frequency Stability	+/- 10 ppm
Data Rate	1800 bps
Channel Space	12.5 KHz
Modulation	FSK (+/- 3KHz)
Antenna	PCB type
Output Power(Max.)	10 mW
Power Supply	Coin Battery CR2032 X 1
Indicator(audio)	No sound
Indicator(video)	1 LED (call indicator)
Size(mm)	67 X 42 X 11
Weight(g)	20
Installation Method	Both-sided Tape

Features

Water-Resistant- IP-53

Eco Friendly Design

(No print / No sticker)

Maximized battery life time
